

Infobright DB Kickstart Services

Accelerate using your new Infobright DB columnar database

Installation and Configuration Services to Kickstart Your Business Intelligence Initiatives

All new Infobright DB customers have the choice to implement Infobright DB or work directly with Ignite Infobright DB experts to quickly get started with delivering the value of the Infobright DB columnar database for your organization.

Kickstart Services, which include configuration and installation of the Infobright columnar database, are delivered by Ignite's global Professional Services organization.

Customers choose Chute's Kickstart Services to:

- Optimize the Platform: Ensure configuration is aligned to specific business intelligence goals
- Accelerate Time-to-Value: Speed-up installation for fastest time to platform use
- Limit resource requirements: Lessen or entirely eliminate added configuration and installation work from already stretched staff who are not yet Infobright DB experts

Infobright DB Kickstart Services Packages

	Small	Medium	Large
Basic Install of DB working connection with 1 application	Yes	Yes	Yes
Install one additional DLP	No	Yes	Yes
Install one additional DLP + automate load process	No	No	Yes

One small package for one product is included annually in the Infobright DB Platinum Customer Support Program. Custom professional services are also available to meet specific customer requirements.

DON'T DELAY

Start Providing Valuable Infobright DB Capabilities To Your Organization Today

- Scalable analytics solution for storing and analyzing big data for interactive business intelligence and complex queries
- Through proprietary columnar storage format with superior compression ratios, improve query performance, reduce storage cost and increase overall efficiency in business analytics and reporting
- Easily store up to several hundred TB of data by enabling superior compression ratios, traditionally not achievable with conventional relational databases
- For big data applications, use commodity hardware and software, and eliminate indexing and partitioning, with zero administrative overhead
