SUMMARY

This national fast-food restaurant uses EPM live to consolidate multiple segregated systems into a single solution, allowing for improved management and reporting.

WHY EPM LIVE

The restaurant chose EPM Live because of its ability to bring together multiple systems and provide a single source for all work assignments. This approach not only simplified day-to-day operations but also eliminated spending on annual maintenance for standalone systems.

CUSTOMER BENEFIT

EPM Live has helped consolidate systems and DBs into a single solution, an approach which has reduced spending on annual maintenance for multiple systems. The solution has also increased efficiencies for users, providing a single source for all work assignments and status updates. EPM Live has also given added visibility into resource demand/workload versus availability/capacity across all types of work.

CUSTOMER OUTCOME

Implementing a multi-maturity level PPM tool increased productivity and reduced overall costs across the organization.

SOLUTION BENEFITS

- Expand Microsoft SharePoint capabilities to provide your organization the ability to manage all projects and work with one solution
- Leverage what you already own in a familiar Microsoft SharePoint environment
- Provide proper toolsets to track and manage all projects, work and associated costs
- Extend management control and leverage expanded business intelligence
