THE FAST AND EASY WAY TO BUILD CERTIFIED 508/ADA COMPLIANT WEBSITES FOR YOUR SCHOOL OR DISTRICT

IgniteTech's School Loop solution provides communications, learning management, website and mobile app services to K-12 school districts. Users can choose from a variety of modules including text, carousels, video, news and events, list of link or files, social media, custom HTML and many more.

SCHOOL LOOP FEATURES

✎ DESIGN

- **Customizable Homepages**
  Our themes let you package and deliver your content with elegance and tailor homepages for your district and schools based on need, resources and ability.

- **Responsive Design**
  All our themes render perfectly on desktop, tablet or mobile.

- **What You See Is What You Get (WYSIWYG) Editing**
  No surprises. What you see is exactly what you get.

- **Modules**
  Users can choose from a variety of modules including text, carousels, video, news and events, list of link or files, social media, custom html and many more.

- **Google Calendar Integration**
  Link Google to our calendar module and get the power of Google packaged in a beautiful display.

WHY SCHOOL LOOP?

- **508 / ADA Certified**
  School Loop is certified to facilitate the authoring of compliant content.

- **Freedom & Control**
  Homepage locking preserves layout while giving users needed flexibility.

- **Fast & Easy**
  Seven cool, responsive templates because no educator has the time to fuss endlessly with websites.

- **By Teachers, For Teachers**
  We're teachers too. You have enough to do without struggling with website design.

- **Special Effects**
  Nothing sells your brand like a little bling!

- **Responsive Design**
  Our templates are responsive, clean and easy to navigate.

IGNITETECH

CONTROL

- **Rights Management**
  A cascading set of rights that allow users to administrate the district overall or a given site, manage a minisite, or be able to contribute to a minisite with the requirement that all pages/content requires approval prior to publishing.

- **Locked Homepages**
  A powerful set of tools that allow district leadership to control exactly what can be edited on homepage.

- **Minisites**
  A minisite is a site-within-a-site that allows webmasters to give control over sections to different users. Minisites can require login, creating an easy-to-use Intranet.

- **Theme Management**
  District leadership can decide which homepage templates are available to site webmasters.

ADMINISTRATION

- **User Management**
  Combined with directory services integration, district and site leadership can control who has access to publishing tools by role.

- **Site Map**
  An elegant model for managing navigation, the site map allows webmasters to add pages, navigation headers, minisites, links and hidden folders and control their placement all from one tool.

- **Document Management**
  A central locker system allows for easy document management, and the ability to replace expired documents without breaking links.

- **District Modules**
  Beyond a district-wide header and footer that wraps around all sites, district leadership can claim any module on a homepage template and publish updates instantly to the module across the district.

COMPLIANCE

- **WCAG 2.0 Compliance**
  Accessibility for all users is assured given a system built from the ground-up for compliance, not retrofit on top of an existing system. Our key development and support leadership have all been trained in compliance as well.

- **508 Certification**
  Our CMS is audited by WebAim, the leading university-based authority on compliance.

- **508 HealthCheck**
  Starting off compliant is one thing. Staying compliant is another.

- **Site Colors & Contrast**
  Our templates offer a wide choice of color combinations while maintaining contrast requirements.
