

Acorn

Managed Administration Service

Alleviate stress in your IT department while maximizing the return on your investment with our Managed Administration Service. Leverage our extensive experience and insight to help you achieve a lower total cost of ownership, a more stable environment and faster issue resolution.

Business Benefits

- Rapid implementation
- Data integration skill set
- Need-based assistance
- Transitional capability
- Predictable cost and outcomes

Optimize Profitability While Managing Costs

Acorn OnDemand provides a cost-effective IT solution that gives you full access. Let our specialists step in and manage the administration of your Acorn environment, leaving you to reap the benefits of our solution without adding stress to your company's technical support or infrastructure. Our dedicated professional services team — with extensive experience and the best profitability and cost modeling management skills available — will ensure that your team spends its valuable time realizing the benefits of your solution, rather than managing it.

We augment your existing staff in whatever manner is required, delivering creative and focused solutions to ensure you meet your objectives and realize real value — within the shortest amount of time and at the lowest risk possible.

Three Components of Managed Administration Service

- Data Integration
- Model Maintenance
- Results Refresh and Validation

Unlock the Power of Your Profitability and Cost Management Solution

■ Data Integration (ETL) Tasks

Transform and load data to the model

- Automation and standardization of extracts
- Data extract validations
- Troubleshoot and maintain data transformations
- Execution of data loads

■ Model Maintenance Activities

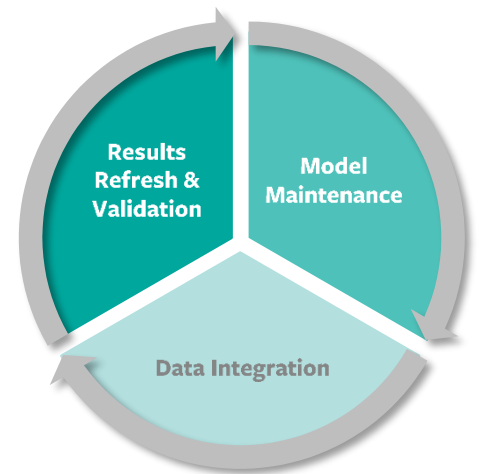

Keep models in sync with business reality

- Administer and maintain models
- Troubleshoot issues with calculations when results do not match expectations

■ Results Refresh and Validation

Ensure relevant and usable results are available for decision support

- Validate results based on raw data inputs and model rules —
e.g., understand the “math” behind a result
- Financial validation of results against published financials
- Operational validation of results to endure business user buy-in
- Established standard month-end outputs and reports for signoff and validation

Managed Administration Service Details
